

MEASURED EFFICACY

We formulate treatments.

FROM CONCEPT TO SKIN VALIDATION

Where formulation meets real skin results

At Neftis, we develop formulations through a science-based approach that combines research, expert knowledge, and real skin evaluation.

We select functional ingredients backed by evidence and design each formula with clear goals: efficacy, stability, and tolerance. Our R&D team and Dermalab work together as one integrated process.

Our formulations are tested on skin using objective instrumental analysis, measuring parameters such as:

- Hydration – Corneometer®
- Elasticity – Cutometer®
- Firmness – Cutometer®
- Pigmentation – Mexameter®

This allows us to refine products based on real results and deliver reliable, reproducible performance.

As a result, we provide our clients with formulations supported by objective evidence and protocols that demonstrate their performance

Because a formula is not enough – it must prove its efficacy on skin.

Our studies focus on the most requested skin concerns (pigmentation, tone uniformity, firmness, and overall skin quality) enabling our partners to confidently brand our standard products and leverage them for cross-selling opportunities.

PIGMENT CORRECTION & FINE LINE TREATMENT

Professional mesococktail with complementary homecare

NEF671

FNEF21

A dual-step professional strategy designed to address hyperpigmentation and overall skin quality through controlled, clinical and domiciliary treatment.

By combining targeted depigmenting actives with hydration-driven support, this protocol helps reduce uneven skin tone while preserving skin balance.

4 sessions | 2,5 ml x session | Microneedling

Clinical Treatment

Tranexamic Acid
Niacinamide
Sodium Hyaluronate
Glutathione
Ascorbyl Glucoside

Alpha-arbutin
Niacinamide
Biomimetic peptides
Antioxidant Complex

Domiciliary Treatment

☀️ Oil Cleansing Gel
Niacinamide Serum
Depigmenting cream

🌙 Oil Cleansing Gel
DNA Cell Repair Serum
Depigmenting cream
DNA Cell Repair Mask
(1-2 times a week)

+25-35%

Dark spot reduction

+13.65%

Firmness increase

+17.11%

Elasticity improvement

+11%

Hydration boost

45-year-old panelist
Photoaging with solar lentigines and diffuse hyperpigmentation.

Before

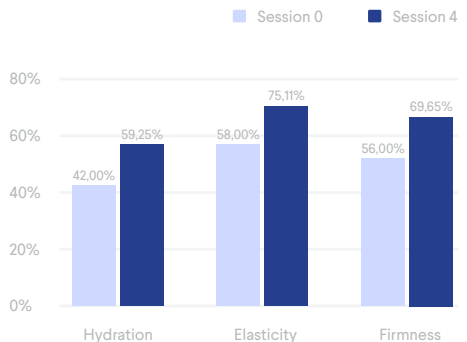

After

Instrumental evaluation

Pigmentation is one of the fastest-growing skincare concerns globally.

However, the market is shifting from single-product solutions to structured full treatment strategies.

These results were obtained from our 45-year-old panelist.

ADVANCED PIGMENT CORRECTION & SKIN REGENERATION

Professional mesococktail with complementary homecare

A professional strategy designed to address hyperpigmentation, fine to advanced wrinkles and overall skin quality through a combined clinical and domiciliary approach.

By combining exosome-derived actives with targeted depigmenting ingredients, this protocol improves skin remodeling, tone uniformity and visible signs of aging while maintaining skin balance.

4 sessions | 2,5 ml x session | Microneedling

Clinical Treatment

Sodium Hyaluronate
Plant-based Exosomes
Panthenol
Sodium DNA

Alpha-arbutin
Niacinamide
Biomimetic peptides
Antioxidant Complex

Domiciliary Treatment

☀ Aloe Vera Cleanser
HA Serum
Ceramides Cream

🌙 Aloe Vera Cleanser
Niacinamide Serum
Niosomes Cream
Retinal Cream

+10-15%

Dark spot reduction

+12,46%

Firmness increase

+18,18%

Elasticity improvement

+15,08%

Hydration boost

56-year-old panelist
Photaging with mixed hyperpigmentation.

Before

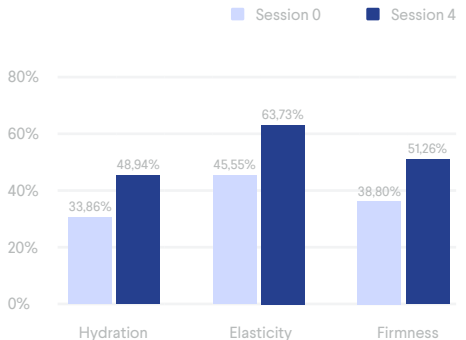

After

Instrumental evaluation

Pigmentation and uneven skin texture are major concerns for skin improvement.

Objective measurements demonstrate visible reduction in dark spots, wrinkles, and improved uniformity.

These results were obtained from our 56-year-old panelist.

TOTAL SKIN REJUVENATION & FIRMING PROTOCOL TREATMENT

Professional mesococktail with complementary homecare

NEF59

NEF877

A professional strategy designed to improve overall skin quality, targeting advanced signs of aging, uneven tone and oxidative stress through a progressive and controlled approach.

By combining bio-revitalizing actives with antioxidant and hydration-supporting ingredients, this protocol enhances skin radiance, refines texture, and stimulates dermal regeneration.

4 sessions | 2,5 ml x session | Microneedling

Clinical Treatment

Glutathione
Superoxide Dismutase
Folic Acid
Brightening complex
Sodium Hyaluronate

PN (Polynucleotides)
Niacinamide
Sodium Hyaluronate

Domiciliary Treatment

☀️ Aloe Vera Cleanser
PDRN Serum
Vitamin C AOX Serum
Peptides Structure
Cream

🌙 Aloe Vera Cleanser
Niacinamide Serum
Niosomes Cream /
Retinal Cream
(alternative days)

+20-25%

Dark spot reduction

+6.98%

Firmness increase

+13.37%

Elasticity improvement

+28.22%

Hydration boost

62-year-old panelist
Advanced photoaging with structural skin aging and diffuse hyperpigmentation.

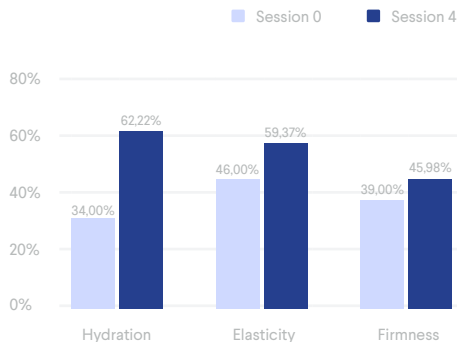

Before

After

Instrumental evaluation

Photoaging and visible aging signs have become key concerns in modern skincare. The market is shifting from single-product solutions to structured, multi-step protocols that more effectively address aging and pigmentation.

These results were obtained from our 62-year-old panelist.

EARLY PHOTOAGING WITH DIFFUSE HYPERPIGMENTATION

Professional mesococktail with complementary homecare

A professional strategy designed to enhance skin elasticity, hydration, and firmness through a combined clinical and homecare approach.

By integrating targeted firming and hydrating actives with a structured domiciliary routine, this protocol improves skin texture, overall quality, and visible signs of aging while supporting long-term skin health.

4 sessions | 2.5 ml x session | Microneedling

Clinical Treatment

Tranexamic Acid
Niacinamide
Ascorbyl Glucoside
L-Glutathione
Sodium Hyaluronate

PN (Polynucleotides)
Niacinamide
Sodium Hyaluronate

Domiciliary Treatment

☀️ Oil Cleansing Gel
Peptides Structure
Serum
PDRN Rich Cream

🌙 Oil Cleansing Gel
PDRN Rich Cream /
Retinol Cream
(*alternative days*)

+11-16%

Dark spot reduction

+15.49%

Firmness increase

+16,67%

Elasticity improvement

+21.30%

Hydration boost

39-year-old panelist
Early photoaging with mild diffuse hyperpigmentation and skin quality decline.

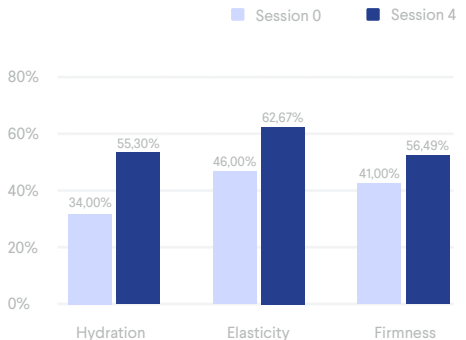

Before

After

Instrumental evaluation

Skin elasticity, hydration, and firmness are key concerns for subjects seeking visible rejuvenation.

The market is moving from single-product solutions to structured, multi-step treatment strategies.

These results were obtained from our 39-year-old panelist.
